

# Delivery plan

When buying products in the control series, a delivery plan as below, will help you achieve a successful installation. An important part in the installation is that both the customer and trained dealers are aware of their own responsibilities and that will be clarified with this delivery plan.

## 1. Order confirmation.

An order confirmation with delivery date will be sent from Creone.

## 2. IT-preparations and installation of KeyWin5.

KeyWin5 Installation-packages including installation guide and system requirements will be sent to the customer. The customer and their own IT department is responsible that the software will be installed on their network and client computers.

## 3. Electrical installation.

Network & Power (230V) must be drawn up in which the product to be placed.

## 4. KeyBox installation.

KeyBox shall be installed by the dealer at the designated location. Installation requires that point 1-3 are completed.

## 5. Education.

Training is planned jointly with Creone AB. Education requires previous commitments are implemented.
